JOURNAL OF APPLIED ELECTROCHEMISTRY **20** (1990) 1071–1074

Index to Volume 20 (1990)

The subject index has been organized into topics for easy reference.

Subject Index

Corrosion and surface treatment

Mechanism of enhancement of the corrosion of steel by alternating currents and electrocatalytic properties of cycled steel surfaces, 26
Anodization of hafnium in phosphoric acid solutions, 39
Nucleation and growth of anodic films on stainless steel alloys. II. Kinetics of repassivation of freshly generated metal surfaces, 45
Nucleation and growth of anodic films on stainless steel alloys. I. Influence of minor alloying elements and applied potential on passive film growth, 223
The electrochemical facetting of metal surfaces: Preferred crystallographic orientation and roughening effects in electrocatalysis, 347
Structural investigations of pyrazole derivatives as corrosion inhibitors for delta steel in acid chloride solutions, 488
Effect of temperature on the formation and dissolution of anodic oxide films on titanium in acid solutions, 494
Cathodic modification as a means of improving the corrosion resistance of alloys, 711
Electrochemical behaviour of rapidly solidified and conventionally cast Cu–Ni–Sn, 756
Voltametric behaviour of iron in cement. II. Effect of sodium chloride and corrosion inhibitor additions, 841
Comportement électrochemique d-alliages Cu–Ni–Cr microcristallins en milieu chlorure, 848
Leaching of Raney nickel composite-coated electrodes, 855
Electrochemical impedance studies on pure aluminium in carbonate solution, 874
Voltammetric and galvanostic studies of hydrous and anhydrous iridium oxide films, 969
The effect of the type of electric current on the cathodic corrosion of aluminium, 986
AC-Impedance measurements on aluminium in chloride containing solutions and below the pitting potential, 996
The application of the electrochemical impedance technique to aluminium corrosion in acidic chloride solution, 1000
Electrochemical impedance spectroscopy as a valuable monitoring technique for various forms of corrosion, 1004
Réduction électrochimique du trichloro − 1,1,2 trifluoroethene: étude de la corrosion chimique de cathodes de zinc, 1045

Electrocatalysis and kinetics

Transition metal-based hydrogen electrodes in alkaline solution-electrocatalysis on nickel based binary alloy coatings, 32
Redox processes at iron hydroxide layers formed on platinum substrates in alkaline solutions, 102
Electrocatalysis of anodic oxygen-transfer reactions: alpha-lead dioxide electrodeposited on stainless steel substrates, 116
Electrochemical and photoelectrochemical behaviour of passivated niobium electrodes during hydrogen evolution, 139
Influence of temperature on the electro-dissolution of tin in NaCl aqueous solution at pH 4, 150
Voltammetric behaviour of platinum in aqueous solutions containing sodium hypophosphite, 245
Phosphate-bonded composite electrodes for hydrogen evolution, 252
Investigation of O_2 reduction in alkaline media on macrocyclic chelates impregnated on different supports: influence of the heat treatment on stability and activity, 260
In situ activation of nickel cathodes by sodium molybdate during alkaline water electrolysis at constant current 281
The electrochemical behaviour of polycrystalline nickel electrodes in different carbonate-bicarbonate ion-containing solutions, 418
Thin films of Co_3O_4 and $NiCo_2O_4$ obtained by the method of chemical spray pyrolysis for electrocatalysis III. The electrocatalysis of oxygen evolution, 442
Properties of Ni–S_x electrodes for hydrogen evolution from alkaline medium, 500
TiO_2 catalysed reduction of Cr(VI) in aqueous solutions under ultraviolet illumination, 518
Particle size and structural effects in platinum electrocatalysis, 537
Electrosynthesis at oxide coated electrodes. Part I the kinetics of ethanol oxidation at spinel electrodes in aqueous base, 549
Electrochemical studies with tin electrodes in citric acid solutions, 672
The influence of electrode porosity and temperature on electrochemical gas evolution at platinum and rhodium, 686
An electrochemical method for the measurement of the heterogeneous kinetics of the uptake of a reactive dye by a cotton cloth, 793
The wall-jet electrode and the study of the electrode reaction mechanisms: the EC reaction, 912
Electrochemistry of anodic fluorine gas evolution at carbon electrodes: Part II. Studies on the 'CF' film by the current-interruption, AC impedance, ESCA and Auger techniques, 916
Electrochemistry of anodic fluorine gas evolution at carbon electrodes: Part III. Characterisation of activated carbon anodes following onset of the 'anode effect', 925
Electrolytic oxygen evolution on Ni–Co–P alloys, 1015
The adatom/incipient hydrous oxide mediator model for reactions on silver in base, 1053
Procedure for solution growth of ZnS, CdS and $Zn_{1-x}Cd_xS$ thin films by successive ionic-layer adsorptions and reactions, 1067

Electrochemical Engineering

HBr electrolysis in the Ispra Mark 13A flue gas desulphurization process: electrolysis in a DEM cell, 60
Potential distribution and electrode stability in a bipolar electrolysis cell, 186
Studies of the pH of the membrane surface in a laboratory chlor-alkali cell, 555
Modification of diaphragm-type chlor-alkali cells to ion exchange membrane cells, 656
Simultaneous solution of the potential equations for the metal and solution phases in cylindrical electrochemical reactors, 723
Flow-through and flow-by porous electrodes of nickel foam. Part IV; experimental electrode potential distributions in the flow-through and in the flow-by configuration, 749
Flow-through and flow-by porous electrodes of nickel foam. Part III: theoretical electrode potential distribution in the flow-by configuration, 740
An analysis of random perturbations in electrolyzers, 901
A three-dimensional current feeder for fluidized bed electrodes, 951
Improvement of the performance of porous electrodes using ionic conducting particles: application to silver recovery, 974

Electrochemical synthesis and production

A microelectrode study of the reduction of formaldehyde in neutral concentrated aqueous solutions, 54
Polished carbon electrodes for improving the fluorine production process, 91
Organic electrosynthesis with a sacrificial anode. Chemical reductive degradation of the solvent N,N-dimethyl formamide, 97
Mediated electrosynthesis with cerium (IV) in methanesulphonic acid, 209
Exclusion of CO and CO_2 from ammonia synthesis gas by an electrocatalytic process, 240
Electrogenerative oxidation of model alcohols at packed bed anodes, 269
Electrochemical reduction of *o*-nitrobenzaldehyde in aqueous ethanolic sulphuric acid medium, 335
Nickel-catalysed electrosynthesis of anti-inflammatory agents. III. A new electrolyser for organic solvents; oxidation of metal powder as an alternative to sacrificial anodes, 341
Kinetic study of the electroreduction of nitrobenzene, 370
Simple electrochemical immobilization of the ferro/ferricyanide redox couple on carbon electrodes, 454
Electrochemical polymerization of 7-methyl-thionapthalene-indole, 468
Electrocatalytic oxidation of hydrogen, formic acid and methanol on platinum modified copolymer (pyrrole-dithiophene) electrodes, 524
An efficient electrosynthesis of 2,4- and 2,6-diaminotoluenes, 527
Electrochemical oxidation of carbon fibres in aqueous solutions and analysis of the surface oxides, 619
Electrochemical synthesis and characterisation of poly(m-toluidine), 640
Reduction of by-product formation in alkali chloride membrane electrolysis, 716
Electrochemical preparation of cuprous oxide powder: Part I. Basic electrochemistry, 818
Electrochemical preparation of cuprous oxide powder: Part II. Process conditions, 826
Simultaneous electrosynthesis of alkaline hydrogen peroxide and sodium chlorate, 932
Electrochemical oxidation of acidic Alberta coal slurries, 941
Kinetics of the anodic oxidation of benzyl alcohol in dichloromethane in the presence of redox mediator and phase transfer catalyst, 978
Electrochemical polymerization of N-methyl-10,10-dimethylphenazasiline, 989
The influence of some fluoroanions on the anodic oxidation of chlorate ion to perchlorate ion at a lead dioxide electrode, 1059

Energy conversion, batteries and fuel cells

Morphological changes in the electrodes of phosphoric acid fuel cells operating under open circuit voltage conditions, 235
Charge-discharge characteristics of polyvinylpyridinium hydrobromide perbromide-carbon paste electrodes, 319
Organic cathode materials in sodium batteries, 357
Effect of hydrogen on the discharge behaviour on the nickel oxide electrode, 377
Development of anodes for aluminium/air batteries-solution phase inhibition of corrosion, 405
Fabrication and properties of combined electrode/electrolyte for molten carbonate fuel cells, 606
The addition of aluminium oxide to the nickel anodes of a molten carbonate fuel cell, 625
Chemically regenerative redox fuel cells. I. Membrane studies, 737
$Li/Li_{1+x}V_3O_8$ secondary button cells: dependence on cycle life on electrolyte nature and cycling regime, 763
Electrochemically formed transient ReS_2/Re_2O_7 heterojunction with high energy conversion efficiency, 786
Structural modifications of a spent molten carbonate fuel cell, 804
Characterization of a morphological modification induced by long term operations on phosphoric acid fuel cell (PAFC) electrodes, 811
Material properties and processing in the production of fuel cell components: Part I, Hydrogen electrodes from Raney nickel for lightweight alkaline fuel cells, 893
Chemically regenerative redox fuel cells: Part II. Regeneration reaction studies, 907
A new $Zn/AlCl_3/MnO_2$ galvanic cell suitable to water activation, 1021

Instruments and analysis

A pressure transducer based on liquid sodium, 395
Electrochemical impedance spectroscopy on porous electrodes, 677
Graphite felt as an electrode for thin-layer electrochemistry, 877
A solid state amperometric humidity sensor, 964

Mass transfer and hydrodynamics

Mass transfer in a gas sparged membrane cell, 145
Overall mass transfer in swirling decaying flow in annular electrochemical cells, 216
Electrochemical hydrodynamics in magnetic fields with laser interferometry: influence of paramagnetic ions, 427
The influence of suspended particles on the mass transfer at a rotating disc electrode. Non-conducting particles, 563
A general computational method for mass-transpart problems involving wall-jet electrodes and its application to simple electron-transfer, ECE and DISP1 reactions, 575
The wall-jet electrode and its application to the study of electrode reactions with coupled homogeneous kinetics: the DISP1 reaction, 586
Mass transfer in a laminar-flow parallel plate electrolytic cell with simultaneous development of velocity and concentration boundary layers, 885

Metal deposition and dissolution

A model of zinc-nickel alloy electrodeposition in a industrial-scale cell, 1
An ac impedance study of the fractal geometry of silver films electrodeposited within a polymer matrix, 23
Electrochemical dissolution of stainless steel in flow channel cells with and without photoresist masks, 69
On the mechanism of electroless plating. Part III. Electroless copper alloys, 85
Kinetic correlations in codeposition of coatings of molybdenum-iron group metal alloys, 132
The effect of pulsed reverse current on the polarization behaviour of acid copper plating solutions containing organic additives, 196
XPS and AES studies of the composition of the viscous liquid film in the electropolishing of copper, 231
Theory of progressive nucleation and growth accounting for the ohmic drop in the electrolyte, I., 301
Ohmic drop and zones of the reduced overpotential during the growth of small clusters, 307
Electrochemical evaluation of copper deposition with gas sparging, 327

A mass transfer model for the autocatalytic dissolution of a rotating copper disc in oxygen saturated ammonia solutions, 365
Studies of the electrodeposition of palladium from baths based on $[Pd(NH_3)X_2]$ salts. I. $[Pd(NH_3)2Cl_2]$ baths, 399
A novel, two-phase medium for electrochemically induced conversion coatings, 457
Mechanistic and kinetic aspects of silver dissolution in cyanide solutions, 479
The application of renewal theory to anodic dissolution processes, 559
The modification of aromatic electrolytes for electrodeposition of aluminium 596
The effect of the concentration of TBACl on the electrodeposition of zinc from chloride and perchlorate electrolytes, 611
Electrodeposition of zinc-nickel alloy coatings: influence of a phenolic derivative, 635
Pulsed electrodeposition of zinc in magnetic fields: diffusion layer relaxation followed by laser interferometry, 781
An electrochemical route to GaSb thin films, 868
Zinc deposition and passivated hydrogen evolution in highly acidic sulphate electrolytes: depassivation by nickel impurities, 1009
Nickel plating by pulse electrolysis: textural and microstructural modifications due to adsorption/desorption phenomena, 1025

Mineral and metallurgical electrochemistry

The effect of nickel on the mechanism of the initial stages of zinc electrowinning from sulphate electrolytes. Part I. Investigation of a spectrally pure aluminium cathode, 11
The effect of nickel on the mechanism of the initial stages of zinc electrowinning from sulphate electrolytes. Part II. Investigations on aluminium cathodes alloyed with iron impurities, 17
Simulation of hydrodynamics and inhibitor consumption in hydrometallurgical plants, 110
Electrowinning of zinc from alkaline solutions at high current densities, 163
On the nature of the 'induction period' during the electrowinning of zinc from nickel containing sulphate electrolytes, 381
The relationship between the growth rate of hydrogen bubbles and the duration of the 'induction period' in the electrowinning of zinc from sulphate electrolytes, 447
High speed zinc electrowinning using a hydrogen gas-diffusion electrode, 475
Oxidation of hydrosulphide ions on gold. Part I. A cyclic voltammetry study, 506
Oxidation of hydrosulphide ions on gold. Part II. Characterization of gold/aqueous hydrosulphide interface, 512
Effect of nickel in zinc electrowinning under periodical reverse current, 630
The effects of antimony on glue on zinc electrowinning from Kidd Creek electrolyte, 728
The effects of saponin, antimony and glue on zinc electrowinning from Kidd Creek electrolyte, 955
The surface oxidation of pyrite in alkaline solution, 1033

Modified electrodes

Infrared reflectance absorption spectroscopy (IRRAS). Study of the thermal stability of perfluorinated sulphonic acid ionomers on Pt, 157
Chemically and physically modified electrodes: some new developments, 175
Simple electrochemical immobilization of the ferro/ferricyanide redox couple on carbon electrodes, 454

Molten salt electrochemistry

Electrochemical studies of zirconium and hafnium in alkali chlorine and alkali-chloride molten salts, 77
Impedance spectroscopy of the Ti(IV)/Ti(III) redox couple in the molten LiCl–KCl eutectic melt at 470° C, 125
Application de la voltampérométrie convolutionnele à la détermination du coefficient de diffusion des ions TiF_6^{3-} dans l'eutectique LiF–NaF–KF de 600° C a 900° C, 289
Erosion of sintered TiB_2-cathodes during cathodic aluminium deposition from $LiCl/AlCl_3$ melts, 438
Measurement of the activity of lithium in dilute solutions in molten lithium chloride between 650° C and 800° C, 864

Solid electrolytes

The mobility of oxygen ions in CaF_2, 294
Limiting current in a high-temperature hydrogen pump with a $SrCeO_3$-based proton conductor, 390
Automatic titration of reducing gases in inert gases using an oxygen pump-gauge, 775

Thermodynamics and physical properties

The potential-pH diagram for the Ru–H_2O–Cl system at 25° C, 522
Ions and solvent transfers at homoionic junctions between concentrated electrolyte solutions, 645
Characterization and use of aqueous caesium chloride as an ultra-concentrated salt bridge, 651
Conductivité électrique totale du système iodure d'argent-diiodure de diazonia-6,9-dispiro[5.2.5.2]hexadecane. Application a l'etude d'un générateur tout solide, 662
Total electrical conductivity of double salts of the type silver iodide-poly(N-hexylene,N′-alkylene,N,N,N′,N′-tetramethyldiammonium diiodide), 692
Electrical conductivity of double salts of the silver iodide triethylenediammonium and N,N′-dialkyltriethylenediammonium diiodide types, 701
Dielectric properties of anodic oxide layers on tantalum, 768
Investigation of anodic aluminium oxide layers by electrochemical impedance spectroscopy, 798
The influence of ion–ion interactions on the kinetics of intercalation in a layered host structure, 835
Electrochemical properties of poly(decaviologen) in polymer media, 1040
